## Accessibility

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

#### CONTRAST

lack

Background and foreground colors do not have a sufficient contrast ratio.

~

These are opportunities to improve the legibility of your content.

#### NAMES AND LABELS

#### Links do not have a discernible name

~

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

#### NAVIGATION

#### Heading elements are not in a sequentially-descending order

.

These are opportunities to improve keyboard navigation in your application.

#### ADDITIONAL ITEMS TO MANUALLY CHECK (10)

These checks ensure that your page is following basic search engine optimization advice. There are many additional factors Lighthouse does not score here that may affect your search ranking, including performance on <a href="Core Web Vitals">Core Web Vitals</a>. Learn more about Google Search Essentials.

#### CRAWLING AND INDEXING

To appear in search results, crawlers need access to your app.

ADDITIONAL ITEMS TO MANUALLY CHECK (1)

Run these additional validators on your site to check additional SEO best practices.
